For the purposes of calculating the Indicative Wholesale Charges for 2021/22 we have used the allowed revenues for 2021/22 as set out in Ofwat's FD. This is in line with our licence obligations. However, our final charges, published next year, will likely vary from these Indicative Charges as a result of any change in allowed revenues arising from the CMA's Redetermination.

INDICATIVE CHARGES FOR 2021/22
Trade effluent - ANGLIAN WATER

For the purposes of calculating the Indicative Wholesale Charges for 2021/22 we have used the allowed revenues for 2021/22 as set out in Ofwat's FD. This is in line with our licence obligations. However, our final charges, published next year, will likely vary from these Indicative Charges as a result of any change in allowed revenues arising from the CMA's Redetermination.

Company comments:

Measured customers are charged on a two part tariff consisting of a Fixed Charge and a variable charge using the Mogden formula. See Wholesale Charges Scheme for more information.

The volume bands are for indicative purposes only. The appropriate tariff will depend on the services received and the loads discharged.

Where charge per m3 of effluent = R + [(V + Bv) or M] + B(Ot/Os) + S(St/Ss)

INDICATIVE CHARGES FOR 2021/22

Foul, highway and surface water (unmeasured) - ANGLIAN WATER (FINNINGLEY)

For the purposes of calculating the Indicative Wholesale Charges for 2021/22 we have used the allowed revenues for 2021/22 as set out in Ofwat's FD. This is in line with our licence obligations. However, our final charges, published next year, will likely vary from these Indicative Charges as a result of any change in allowed revenues arising from the CMA's Redetermination.
